

# TRANSFORM THE STARTILE

New Star Lighting's standard edge-lit StarTile provides the perfect light distribution for any application. Transform the versatile StarTile in a variety of ways including our new Recessed Frame. StarTiles are available in Surface, Grid or Flange installation with an opal polycarbonate lens and standard dimming driver.

**NEW**  
**STARTILE RECESSED FRAME**

The Frame elevates the StarTile 3-inches above the Grid providing a cove-like or skylight appearance. Available in an Angled Frame or Straight Edge Frame.

**STARTILE IMAGE OVERLAY**

Variety of high-quality image overlays with the option of a custom image. Image Overlay StarTiles can be configured as a standalone image or into a mural.

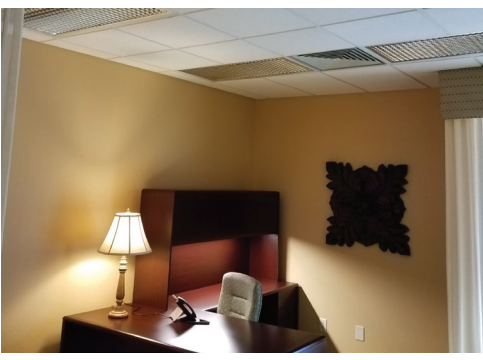

**NEW**  
**RECESSED KIT**

Optional Recessed Kit with Image Overlay StarTiles. Straight edge frame raises the image above the standard grid to provide aesthetic appeal.

**TUNABLE WHITE**

Tunable White StarTiles are the perfect addition to any healthcare facility, school or office space. Color temperature ranges from 3000°K-6000°K.

**LOUVER STARTILE**

Standard StarTile is paired with a Specular Polystyrene Louver to provide a glare-free environment perfect for the office, lobby or retirement facility.

**STARTILE DL**

The white acrylic outer lens with the StarTile provides an even illumination while providing a unique decorative appearance.
